

ARG-WL8-IN**wireless single input module**

ARG-WL8-IN is designed for monitoring one input circuit and sending information to the control panel.

Using well-proven wireless technology ensures the highest levels of life safety and system reliability. The wireless input module and magnetic detector detects a forced entry into protected premises through doors and windows and/or monitors one input circuit and sends information to the control panel.

**Features and benefits**

- Programmable input for fire and security detectors, emergency button or specialized detectors
- Bi-directional wireless communication
- Fully intelligent
- 10 years of battery life
- Self-optimizing wireless frequency and amplitude algorithms
- 5 years product warranty

Technical specifications

Communication range with the translator or repeater (open space)	1200 m
Operating frequency	868 MHz
Modulation type	FSK
Operating frequency channels	6
Battery life (rechargeable battery):	
Primary battery (type CR123A)	8-10 years
Secondary battery (type CR123A)	6-12 months
Dimensions	110 mm x 30 mm x 37 mm
Weight	200 g
IP rating	IP41
Max tolerated humidity (no condensing)	95% RH
Operating temperature range	From -30 °C to +55 °C

Warranty

All devices are supplied with the benefit of a limited 5 years warranty (the warranty period does not apply to battery). This warranty is invalidated by mechanical or electrical damage caused in the field by incorrect handling or usage. Product must be returned via your authorized supplier for repair or replacement together with full information on any problem identified.
